

P900 Photographer's Tripod

Through design and use of high quality materials the P900 tripod offers durability, stability, and ease of use.

The composite, stainless steel and anodized aluminum components provide resistance to impact, corrosion and moisture allowing use in extreme environments, giving you confidence that it will work the next time you need it.

The legs are a wide frame single extension design. This creates a rigid and stable platform by reducing the number of joints where un-wanted movement can take place. Carbon-fiber reinforced leg tubing has increased stiffness and decreased vibration, all helping you obtain the best image results possible.

Setups are quick and easy with three pre-set leg angle positions and a single quick lock lever handle for leg height adjustment. Standard 3/8"-16 threaded stud for equipment attachment.

Features and Benefits

- Carbon fiber-reinforced tubing is high strength and unaffected by moisture
- Tripod components made of injection-molded plastics, stainless steel and 6061 grade aluminum
- Quick Lock positive clamping leg adjustment provides for quick and easy setups
- Three indexed leg positions
- 2 year warranty

P900 Standard Height Specifications

Weight	6.25 lbs. (2.83 kg)
Length extended	59.5" (151 cm)
Length collapsed	34.5" (88 cm)
Head	composite
Max work load	28 lbs (12.7 kg)
Color	black only
Warranty	2 years

P900 Extended Height Specifications

Weight	6.5 lbs. (3 kg)
Length extended	71" (180 cm)
Length collapsed	41" (104 cm)
Head	composite
Max work load	28 lbs (12.7 kg)
Color	black only
Warranty	2 years
