

TP4000

The TP4000 is designed specifically for marsh and tundra use. The lower section single-tube extension leg has additional length for greater penetration, providing more stability on unstable ground.

Features and Benefits

- Wide Frame extension leg design
- Extra long single tube lower leg section with no protuberances for easy penetration into unstable soil
- Fiberglass composite legs don't shrink and swell with changes in moisture
- Thermoplastic, stainless and aluminum components for durability and corrosion resistance
- Quick Lock positive clamping leg adjustment provides for quick and easy setups
- Replaceable stainless steel foot point
- Mechanically fastened parts (not glued on) for easy replacement
- 5 year warranty
