

## Manufacturing Capabilities

Dutch Hill Corporation provides **precision CNC machining solutions**, specializing in milling and turning of high-quality components for a wide range of industries. We focus on accuracy, repeatability, and dependable delivery—from prototype to production.

### CNC Equipment

#### Vertical Machining Centers

- HAAS VF2SSYT with 4th Axis
- HAAS VF4SS with 4th Axis

#### CNC Turning Centers

- HAAS TL1 Lathe
- HAAS ST10 Lathe

### Engineering and Design Support

Our team provides **engineering and design assistance** to support your project needs. We help refine part designs to meet functional requirements while improving manufacturability, cost efficiency, and overall production success.

### Value-Added Services

**Metal Finishing:** We work with trusted local partners to provide metal finishing services including:

- Anodizing
- Passivation
- Powder Coating
- Other chemical coating processes

**Assembly:** Dutch Hill Corporation offers in-house assembly support including:

- Installation of threaded inserts
- Sub-assembly and full multi-part assemblies
- Integration of customer-supplied and COTS components
